Independent auditor's report on review of interim financial information

To the Management of Mitsui Sumitomo Insurance Company Limited Thailand Branch

I have reviewed the accompanying statement of financial position of Mitsui Sumitomo Insurance Company Limited Thailand Branch as at 30 September 2021; the statements of comprehensive income for the three-month and nine-month periods ended 30 September 2021; the statements of changes in Head Office Account and cash flows for the nine-month period ended 30 September 2021, and the condensed notes ("interim financial information"). Management is responsible for the preparation and presentation of this interim financial information in accordance with Thai Accounting Standard 34, "Interim Financial Reporting". My responsibility is to express a conclusion on this interim financial information based on my review.

Scope of Review

I conducted my review in accordance with the Thai Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Thai Standards on Auditing and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

Conclusion

Based on my review, nothing has come to my attention that causes me to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with Thai Accounting Standard 34, "Interim Financial Reporting".

Measurement of fair values

When measuring the fair value of an asset or a liability, the Branch uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the assets or liabilities that are not based on observable movement date (unobservable inputs).

If the inputs used to measure the fair value of an asset or liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Branch determines Level 1 fair values of investment in marketable equity using last bid price from SET at the reporting date.

The Branch determines Level 2 fair values of investment in debt securities by reference to the price provided by the Thai Bond Market Association at the reporting date, and for unit trusts using net assets value (NAV) published by asset management companies at the reporting date.

The Branch determines Level 3 for fair values for non-listed equity securities using the discounted cash flow method which is the last value published by General Insurance Association or net asset values of those non-listed companies.

The Branch recognises transfers between levels of the fair value hierarchy as of the end of reporting period during which the transfer has occurred.
